NOTICE TO OUR CINEMA/RELATED INDUSTRY COLLEAGUES

The CIBF of Victoria notes the current unsettled environment arising from the ongoing threats from the Covid-19 virus circulating in Australia and indeed throughout the World. No area seems immune and despite the best efforts of Authorities, there continues to be expansion of infection in some regions. Our Organization sympathizes with those impacted directly by both these conditions and associated and varied new Legislation being introduced.

The present situation has been considered by the Council of the CIBF of Victoria who are increasingly cognizant of the various personal and other effects arising from this unique and unusual virus & economic climate.

Our Council acknowledges that the present situation is changing rapidly and constantly and that overall it may just be a matter of “wait & see” over time. The effects of various Authorities’ ongoing legislative pronouncements and the inherent need of change in normal routines, will all take some time to have influence, but we do feel matters are slowly moving in a positive direction.

Our Fund, having been established in the mid 1930’s, has for many of the intervening years to date, been supporting and assisting eligible members of our Industry, when unforeseen circumstances lead to requests for our assistance from those most severely in need. Of course not all of those seeking our help can be or are assisted by us and in so many instances people have been able to solve their problems in other ways. CIBF of Victoria looks at any requests on a one-by-one basis and makes in-depth investigation of the circumstances, with our decisions regarding any potential provision of assistance or support, made strictly upon responsible financial and budgetary management of our Fund.
